Ortho-pods Pro™

Anatomisk designet Orthopediske Fotsåler

Konsept:

Bruken av fotsåler har vokst eksponensielt i løpet av de siste 10-årene etter som forståelsen og aksepteringen av føttenes mekanikk-, muskel- og skjelettsystem er etablert.

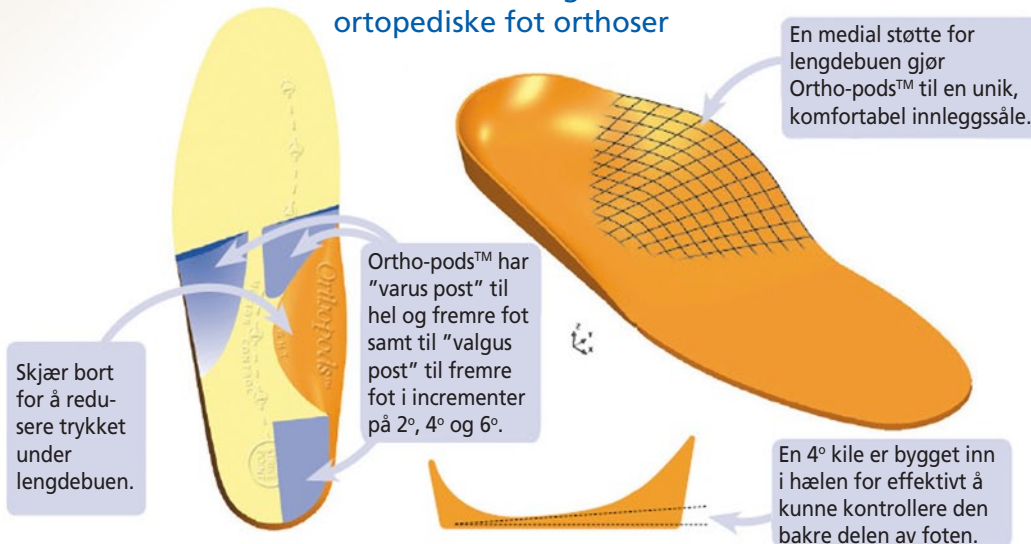

Å skreddersy fotsåler til den enkelte fot er ofte kostbart og tidkrevende. Det er også en øket forståelse for at de fleste tilstander kan rettes ved å bruke et godt designet, prefabrikkert system. Orthotic-Lab Limited satte seg fore å produsere et stort spekter av "Anatomisk Designede Fot Orthoser" til det "profesjonelle markedet", men også til løssalgmarkedet.

Ortho-pods™ produktspekter er basert på CAD (Computer Aided Design) og CAM (Computer Aided Manufacture) teknologien, og har dratt fordel av god rådgivning fra fotspesialister, ortopediske kirurger, rehabiliteringsspesialister, ingeniører og materialspecialister.

Fordeler:

De største fordelene ved orthosene fra Orthotic-Lab Limited inkluderer:

Anatomisk designede ortopediske fot orthoser

Ortho-pods Pro™ tilbyr en rekke nye egenskaper slik som ergonomisk design, dyp "hæl cup", et stort spekter av størrelser for å kunne tilby førsteklasses nøyaktighet, utstyrskomponenter for ytterligere modifisering og orthoser med varierende tetthet, det vil si fra bløte orthoser til harde orthoser, alt for en øket komfort.

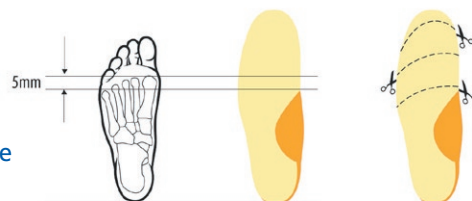

Tilleggsutstyr:

"Varus post" til hæl
"Varus post" til fremre del av foten
"Valgus post" til fremre del av foten
Met Pad
Met Prop
Met Dot

Tilpassing:

1. Velg orthose med riktig "hardhet"
2. Velg riktig størrelse og klipp bort overflødig såle slik som på tegningen til høyre
3. Modifiser ved å bruke ekstrautstyret
4. Kan varmebehandles ved å bruke en varmpistol/hårføner for å oppnå en bedre form og nøyaktighet
5. Tilpass til skoen

Ortho-pods™ Foot Orthotic Range
